**15.02.22**

***Здравствуйте, уважаемые студенты группы 405!***

**Учебная дисциплина: Английский язык**

**Тема урока: The problems of ecology. Проблемы экологии.**
***Задание к уроку:***

*Вам необходимо самостоятельно изучить материалы урока и письменно выполнить задания.*

*Выполненную работу оформить и отправить отдельным файлом (электронный документ) в личное сообщение через социальные сети VK*

*Светлана Николаевна* **https://vk.com/id472555003**

*Если такой возможности нет, выполненное задание предоставить в распечатанном (рукописном) виде в период прохождения учебной практики.*

**Откройте тетради, запишите дату и тему урока.**

**Задание №1. Запишите слова и выучите их.**

| | |
|---|---|
| Human being- человечество<br>Unfortunately– к сожалению<br>Scientists – ученые<br>Environment- окружающая среда<br>To suffer- страдать<br>Fuel – горючее<br>Emissions –выбросы<br>Wastes - отходы | To apply- относиться<br>Appearances- явления<br>Acid rains –кислотные дожди<br>To emit- выбрасывать<br>Soil –почва<br>To subject – подвергаться<br>Substance - вещество |

**Задание №2. Прочитайте и переведите текст устно.**

Our planet is the only place where a **human being** might live. **Unfortunately**, scientists haven't yet discovered other planets, to where a person may move and live during his life. That's why we have to take care of the Earth and look after our nature and **environment** as well as possible.

A human being is able not only to create but also to destroy. Especially our earth **suffers** from harmful actions of man. This **applies** to both: people's neglectful attitude to the nature – dropping of cigarette ends, rubbish on the earth and industrial factories and natural **appearances** - e.g. **acid** rains. We live in the changeable world where it is very difficult to keep up with new ideas and innovations.

Factories regularly **emit** harmful chemicals into the air. Petrol and gas that are used by our drivers also leave much to be desired. Apart from air pollution, water and **soil** are **subjected** to pollutions as well. When such **fuels** as coal and oil burn, they emit very dangerous smoke.

A person destroys not only environment, plants, animals, but also himself. Faster and faster man's health starts worsening; children of weak immune system are being given birth. Forests are being cut down, and animals from the Red Book are gradually disappearing. What will be next in our world of progressive technology – this question remains undecided. Let's protect the nature. Nature is our friend!

## Задание №3. Ответьте письменно на вопросы.

1) What kind of world do we live in?
2) What is the greatest problem for mankind today?
3) What pollutes air, water, soil in industrial cities?
4) What did the Chernobyl disaster show?
5) What does green movement do?

## Задание №4. Дополните предложения словами из скобок.

1) We live in a **…….** world.
2) We seldom think that inventions bring **…….** to a man.
3) Uncontrolled **……**of harmful substances pollute everything around us.
4) Green movement calls for nature **……..**
5) In 1986 Chernobyl **……** showed that nuclear energy can be extremely **……..**
6) We should find the way of **…….** wastes.
7) The problem of**……** is extremely actual problem for industrial cities.

(**recycling, changeable, harmful, pollution, dangerous**, **emissions, disaster, protection)**
